

EU HEALTH PROGRAMME (2008-2013):

PARTNERSHIP PROPOSAL

Seeking: Project coordinator in the field of health promotion and/or the reduction of health inequalities

DRAMMEN
KOMMUNE

About Drammen municipality, Norway: The city of Drammen is located 45 km west of Oslo. The municipality has a population of close to 62 000, but additional 60 to 90 thousand in surrounding municipalities regard Drammen as their regional centre. The city is growing rapidly, and during the last few years population growth has exceeded 2 per cent per annum. Drammen is a multicultural city and is, second only to Oslo, the Norwegian city with the highest number of citizens with immigrant background.

Current relevant activity: Development of a Health programme

Drammen municipality is planning a ten-year programme to **promote health and reduce health inequalities** in one of the boroughs. Drammen is seeking project partners for a transnational project in this field and wants to participate as an associated partner.

The borough where the programme will be carried out has about 5 000 inhabitants with background from a wide range of countries.

Objectives for the programme:

- social and environmental development
- to promote healthier ways of life

Inhabitant involvement is crucial to the programme, regarding to

- identifying programme objectives
- developing and establishing actions, regarding to
 - infrastructure
 - places to meet
 - nutrition and physical activities

During the programme we want to develop:

- knowledge about how to arrange for participation and empowerment
- knowledge about how infrastructure-development effects health inequalities
- methods for measuring effects of the intervention
